ΛΥΣΕΙΣ ΑΣΚΗΣΕΩΝ
**Πολυμορφισμός –
Αφηρημένες Κλάσεις (Polymorphism –
Abstract Classes)**

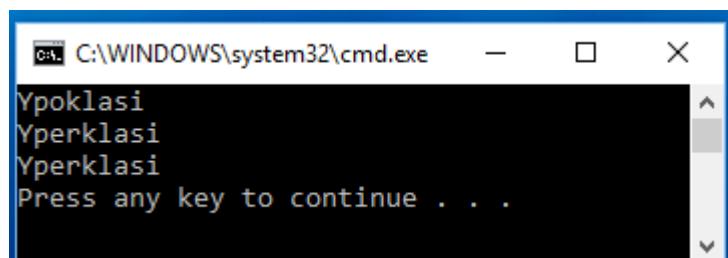

ΑΣΚΗΣΗ-1^η

Απόκρυψη Πεδίων (Hiding Fields)

```
class SuperClass
{ String f = "Yperklasi";}

class SubClass extends SuperClass
{String f = "Ypoklasi";}

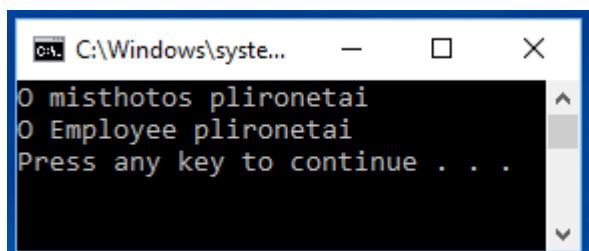

class YpervasiPediou {
    public static void main(String[] args) {
        SubClass p1 = new SubClass();
        System.out.println(p1.f);
        SuperClass p2 = new SubClass(); //αναφορά υπερκλάσης σε αντικ. υποκλάσης
        System.out.println(p2.f); //πρόσθαση
        System.out.println(((SuperClass)p1).f); //casting
    }
}
```

ΑΣΚΗΣΗ-2^η

Στατική και Δυναμική δέσμευση

```
class Employee{  
    public void Salary(){  
        System.out.println("Ο Employee plironetai"); } }  
  
class Misthotos extends Employee{  
    public void Salary(){  
        System.out.println("Ο misthotos plironetai");  
    }  
  
}  
  
class Test {  
    public static void main( String args[]){  
        Employee obj1 = new Misthotos();  
        obj1.Salary(); //static binding  
  
        Employee obj2 = new Employee();  
        obj2.Salary(); //dynamic binding  
    }  
}
```

ΑΣΚΗΣΗ-3^η (Τυπικό Παράδειγμα Πολυμορφισμού)

```
class Animal {  
    void sound() {System.out.println("Animal Sound");}  
}  
  
class Cat extends Animal {  
    void sound() {// Overriding  
        System.out.println("Cat Sound: miaou");}  
}
```

```

class Dog extends Animal {
    void sound() // Overriding
        System.out.println("Dog Sound: woof");
}

class testPoly {
    public static void main(String[] args) {
        Animal animal = new Animal();
        animal.sound();

        Cat cat = new Cat();
        cat.sound();

        Dog dog = new Dog();
        dog.sound();

        System.out.println();
        System.out.println("Poly-1: Animal c = new Cat();");
        System.out.println("-----");
        Animal c = new Cat(); //ότι η κλάση και όχι η αναφορά
        c.sound();           //η cat sound()

        System.out.println();
        System.out.println("Poly-2: Animal c = new Dog();");
        System.out.println("-----");
        Animal d = new Dog(); //ότι η κλάση και όχι η αναφορά
        d.sound();           //dog sound()
    }
}

```

```

C:\WINDOWS\system32> Animal Sound
Cat Sound: miaou
Dog Sound: woof

Poly-1: Animal c = new Cat();
-----
Cat Sound: miaou

Poly-2: Animal c = new Dog();
-----
Dog Sound: woof
Press any key to continue . . .

```

ΑΣΚΗΣΗ-4η (Upcasting - Downcasting)

```
class Camera {  
    public void start(){  
        System.out.println("Camera started"); } }  
  
class Nikon extends Camera {  
    public void start(){  
        System.out.println("Nikon started"); }  
    public void snap() {  
        System.out.println("Photo taken"); } }
